Website with Documentary to be Corroborated as its Syntax -

<https://situationist.org/>

All of this is Prophetic writings by Guy Debord, he even explains that the image is what one is calling Sirohi these days - that he will then walk over and meet Milner and Mariano - I call that a constituted syntax which then is based on psychoanalysis but also on the nature of a vertical wild-cat strike Lenin type figure and a simple man who responds - this then is the meaning of creativity that the image in all contexts is finally discussed again and again.

When a judge is condemning the student movement, read its images - that in fact the students are anarchic and revolting to CPSU and Louis Althusser also it means, but in fact Althusser is among the student - I call this image syntax.

Be critical and be thoughtful - even if it fails it was true.
